## ClearSight Early Grades: K–2 Math and ELA Tests

ClearSight provides an offering for kindergarten through second grade.

- Survey tests contain content from across the set of grade-level standards and have no more than 12 items on each form.
  - Survey tests should be used to take a quick look at student performance on grade-level standards.
- ClearSight Formative tests are organized by topic or by areas of curriculum that are often taught together and range from 3-12 items per form.
  - ClearSight Formative tests should be used as pre- and post-tests, as quizzes, as a check for persistence of knowledge, or any way that aids the teacher during instruction.
